

Vinyl Chamfered and Bull Nose Casing Beads are used like traditional stucco casing beads to terminate stucco at all openings, such as windows, doors and at the top of walls. The Chamfered and Bull Nose Casing Beads match the profile of the Chamfered and Bull Nose Reveals. These products were designed to satisfy the demand for innovative and creative stucco accessories. When used with stucco reveals of the same design and our Chamfered and Bull Nose Corner Beads, the entire look of the stucco assembly is enhanced. (Patent #D471991S)
